MASONAIR™ LS9500 TURN-STYLE LATERAL ROTATION SUPPORT SURFACE WITH LOW AIR LOSS

The Masonair™ 9500 Turn-Style system incorporates the functions of lateral rotation and low air loss in one unit. The user-friendly high flow control unit powerloft pro 9500 offers 10 comfort levels; adjustable turning cycles and a maximum turn angle adjustment of up to 40°. The continuous feedback sensor technology of the Powerloft pro 9500 control unit will equalize pressure and maximize patient comfort. The mattress is constructed of (20) 8" high split-air cells over a 2" foam base with (2) 10" high side air bolsters. The 2 side air bolsters provide the patient with optimal comfort while creating a safe environment during rotation. The lateral rotation mode will assist in pulmonary blood flow and mucosal drainage, while the "on demand" low air loss function will provide a cool and dry surface for prevention and treatment of bed sores.

FEATURES

- On demand low air loss feature
- Lateral Rotation
- High airflow multi-function control unit
- 2" foam base in case of power failure
- 10, 20,30 & 60 minute adjustable turning cycles mode.
- 1/4, 1/2, 3/4 & full position adjustable turning positions
- Microprocessor pressure sensing technology to produce low pressure support.
- 10 adjustable comfort levels and adjustable turning angle up to 40°
- Audible and visual low pressure alarms.
- Vapor permeable, waterproof and fire retardant top cover.
- CPR deflation in 20 seconds.
- 12 month warranty.

- Limited warranty
- Protected by \$5,000,000 in Product Liability Insurance
