

Winter Wonderland

Believe it or not people still ride right on through the winter. And why not? It is actually refreshing! There is plenty of heated gear and bike gear to keep off the cold. I have actually seen some riders with no windshields and no heat gear---now that is brave! I bet your bike likes it better than the sweltering heat!

Enjoy the Ride!

New for 2008!

Yamaha Raider 1900

- Jewel-like fit and finish, and Star quality paint, chrome and attention to detail are evident all over the Raider S.
- Cool, tank-mounted instrumentation complements the custom look, and contains analog speedometer and fuel gauge, along with twin digital trip meters, odometer and self-diagnostics.
- Oxygen sensor and three-way catalyst reduce emissions.
- New design all-aluminum cast frame is light, rigid and tuned for light, athletic handling. A light, Controlled-Fill, aluminum swing arm casting complements the bike's lithe style.
