POOL & HEARTH

POOLS FIREPLACE INSERTS GAS LOGS STOVES • FALL 2008

LOWER YOUR HEATING BILLS WHILE YOU STAY WARM & COZY

Leisure World is your complete fireplace source for the best products, service and technical expertise. We specialize in all things fireplace related including gas logs and inserts; wood-burning stoves, inserts and furnaces; pellet and corn burning stoves, inserts and furnaces; and even electric fireplaces. Whatever your need, we have the perfect product to add warmth and efficiency to your home and make it look great, too!

GAS LOGS & STOVES

Many people take their inefficient fireplace for granted. The Leisure World team is changing this fireplace perception one customer at a time.

The easiest way to transform an ordinary room into a cozy and inviting room is simple—make use of your fireplace! If you have gas service to your fireplace, it's very easy to install one of our many gas log sets. There are literally hundreds of gas log sets on the market that look and perform

differently and are available in various price ranges. Selecting the right product can be overwhelming.

The staff at Leisure World specializes in guiding our customers to the perfect product by asking the appropriate questions and providing an on-site evaluation at no charge. We have products that cover the entire spectrum of performance, size and style without compromising quality and efficiency.

Additionally, as with all of our products, we have our own installers. This means the job will be done correctly the first time and we will be there in the future to support the product if there is ever a problem. We are proud to offer the full line of gas products from Monessen Hearth Systems (www.monessenhearth.com) and Buck Stove (www.buckstovecorp.com). Did we mention that our gas appliances provide heat even when the power is out? And you can operate them with a variety of available remote controls including one remote with a thermostat that automatically controls room air temperature.

WOOD BURNING

Most people interested in wood burning appliances are either looking for a way to reduce their energy bills or they simply love the unparalleled warmth of wood heat. Our products heat with great efficiency and look good too.

Today's wood stoves and inserts are much cleaner and more refined than the stoves of yesteryear. They produce more heat with less fuel, generate virtually no creosote buildup in the flue and provide excellent viewing of the firebox. In fact, the glass stays so clean while burning that you might find you'll watch the fire more than the TV! Leisure World carries the finest name in wood stoves—the original Buck Stove (www.buckstovecorp.com).

In addition, we specialize in designing and installing chimney systems to be used with our wood burning products. We stock a large inventory of Class A chimney pipe in both 6" and 8" diameter as well as the other components needed to safely install a flue system for a wood burning appliance.

PELLET & CORN BURNING

If you're one of the many people who don't want to pay the gas company,

love the feel of wood heat, but simply don't want to deal with the mess and work associated with true wood burning, look no further than one of our many pellet or corn stoves.

Wood pellet and corn burning stoves both work in a very similar fashion—at the touch of a button. All the user must do is keep the stove fueled (generally adding a 40 pound bag per day) and adjust the fuel feed to the desired rate.

If you've never heard about pellet stoves or haven't seen one in operation, now is your chance. Leisure World has a large selection of pellet stoves and inserts and always has at least one stove in our store set up to burn. So please come by and ask for a demonstration of these amazing products in action. We carry Breckwell, Lennox, and Kozi pellet stoves (www.breckwell.com, www.lennox-hearthproducts.com, www.kozi.com) and Magnum corn stoves (www.magnumheat.com).

ELECTRIC FIREPLACES

The newest niche in the fireplace market is electric fireplaces and stoves. If you have no need for high heat output or no way to vent a wood, pellet or vented gas appliance and simply want to add the look of a real fireplace, an electric fireplace from Dimplex is the answer.

Available in a variety of styles from classic to contemporary, we offer many possibilities for adding an electric fireplace to your home. All you need is a nearby electric wall outlet. Before you know it, you will have a fully functioning fireplace.

New Hearth Products Manufacturer

We welcome the LENNOX brand hearth products to our family. With a name that stands for quality, Lennox products complement our product offerings. Complete wood, gas, pellet, and electric stoves, inserts, fireplaces and logs add a unique look with a reliable history.

Stop in to inquire about these exclusive products.

HELP US WELCOME ANNALEE

AnnaLee Heinrich has recently joined the Leisure World Pool and Hearth team as the In-store Manager. She brings a vast knowledge of the hearth side of our business from her previous career and is quickly learning everything about pools. Stop in this winter to help us give her a warm welcome to our family.

Ducane Grills Are Better Than Ever

2008 marks a new beginning for Leisure World's gas grills. As you may know, for many years we've sold Ducane grills. Ducane's motto has long been "buy your last grill first." Ducane grills have traditionally been made

from premium materials including aluminum and stainless steel.

Recently, Ducane was acquired by grill manufacturing giant Weber. Weber has dramatically changed the look of the Ducane line but left one thing alone—the quality—which is better than ever. We think the new look is much more contemporary and appealing. The Weber/Ducane merger also gives us access to the full line of Weber offerings.

Our favorite Weber grill is the Weber "Q." This compact tailgating grill is the best value in our entire store. Retailing for only \$160, this all-aluminum grill with a cast iron grate is truly a marvel of quality and value. Come

check one out today—after all, it's looking like the tailgating at Arrowhead this year may be the high point of activities related to the Chiefs!

While you're here, check out the two new lines of Ducane grills—Meridian and Affinity. Meridian grills, made entirely of stainless steel, are the nicest and most advanced grills on the market. Standard features include a side burner, marble-surfaced side workspaces, electronic ignition, rotisserie burner with infrared burner, and a halogen light in a grill starting at around \$800.

Ducane®

2009 Chemical Price Update

For most of the 2008 swimming season, chemical prices remained stable. By the end of the year, manufacturers began announcing price increases for 2009. We are currently expecting several price increases on pool related items including chemicals, equipment, and parts.

Leisure World is absorbing many of these increases. More importantly, we are doing everything in our power to find ways to keep any price increases to a minimum. We are actively working with our distributors to secure high quality products at lower prices earlier in the season to help avoid later increases.

Off Season Pool Work

The term 'out of sight, out of mind' pertains to most pool owners when the pool is closed for the season. We encourage you to think proactively about your pool in the off season and schedule as much needed service work as possible during this time. While not all services can be performed in the winter, the following is a list of winter services we can provide to prepare your pool for the 2009 swimming season.

- Replacing o-rings and gaskets, baskets, etc.
- Changing sand in the filter
- Troubleshooting noisy pump motors, leaky seals, filter valves and key covers
- Re-plumbing any leaky pipe joints, pump, or filter leaks

Remember, with probable price increases next year, any work done sooner rather than later not only gets your pool prepared for the season, but it likely will be less expensive.
