EmFinders
Call Center

EmFinders activates device

EmSeeQ device transmits location directly to 911 operator

911 sends emergency response unit for rescue

Wanderer is safely rescued and returned home

EmSeeQ

The EmSeeQ is a water-resistant, light weight device designed to be worn like a watch at all times. It is equipped with either a standard band or a stainless steel two-handed clasp. The EmSeeQ is the only device of its kind that is integrated with the secure and reliable national E911 Emergency System. It uses cellular network based advanced triangulation technology to accurately determine a person's location, and works virtually anywhere your loved one may wander.

Key Features

- Digital National Cellular Coverage integrated with E911 System to immediately locate your loved one
- Emergency center available 24/7 to activate your device and assist you with your emergency
- Unlike GPS, EmSeeQ locates reliably indoors, in urban canyons and under cover*
- Unlike Radio Frequency Proximity, no additional equipment or range limitations exist
- Emergency responders have access to critical emergency information
- Standard or Secure water-resistant band that is adjustable for any user
