

Available With Single or Double Rails

Single rails are ideal when the bed is placed against a wall. This is also a good option for couples sharing a bed and only one person requires assistance.

Specially-curved rails help to prevent limbs from becoming trapped between bed and rail

Use double rails when the bed is open on both sides to provide additional safety.

Adjustable rail height to fit different mattress thicknesses

Specifications:

Width of Rail: 40.5"
 Height of Rail: 18"
