

## MDX Debris Removal System Drain

### RELIABLE. EFFECTIVE. SAFE.

At Paramount we believe that just as you demand safety features in the car you drive - seat belts, child seats, airbags - so should you demand them from the pool you swim in. Having a swimming pool should be a pleasurable experience. Equip your pool with the most innovative technology available and enjoy a worry-free pool ownership experience. More than just a drain, MDX is a Debris Removal System that effectively whisks away debris while providing multiple layers of anti-entrapment protection for your loved ones.

What a wonderful and exciting decision it is to choose to build a pool in your family's backyard. You've decided to invest in your health, happiness, and personal enjoyment, while also adding to the intrinsic, aesthetic, and financial value of your home. Making the decision to build a pool is exhilarating. Deciding upon the details of the design and construction - that's an adventure! Today there are more design features, styles, options, and automation than ever before available for your pool. The only limit is your own imagination. As you decide upon each detail and feature, you are seeking quality materials, superior craftsmanship, and the most advanced innovation. Each item, from the drain to the cleaning system, should meet the stringent criteria you set. Not to mention the demanding regulations of your state.

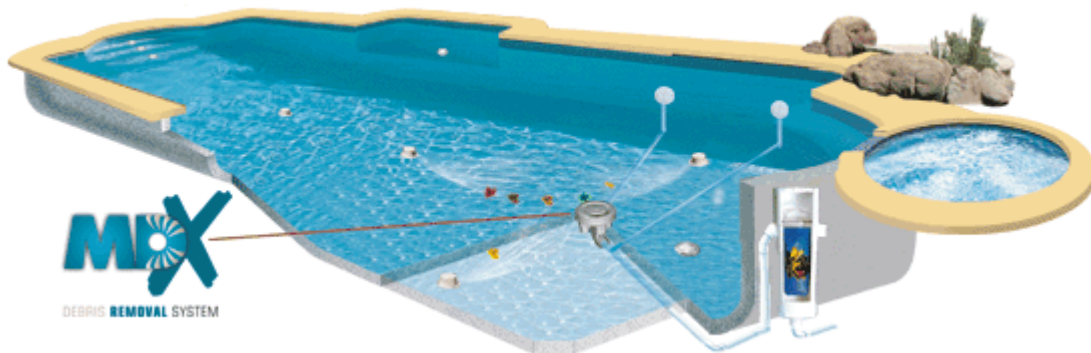

With these regulations in mind, Paramount Pool & Spa Systems created the **MDX Debris Removal System™** drain with multiple layers of anti-entrapment protection for you and your loved ones and guests - even if the drain cover is missing! The **MDX Debris Removal System™** drain is designed to exceed anti-entrapment requirements in the United States today. You don't want to build a pool without it.

- Listed and Certified by IAPMO, a nationally recognized testing laboratory.
- Unique funnel-shaped design compresses and directs debris to the outlet port for quicker, more powerful removal with less likelihood of blockage.
- Low profile design, large uneven surface, and smooth edges are friendly to bathers.
- Large debris passes efficiently through MDX for easy removal outside the pool.
- Designed to far exceed anti-entrapment requirements in the United States today.
- Available in eight colors, the colored parts are interchangeable to adapt with your pool.
- Offered with an optional canister to make debris disposal easy, convenient, and out of sight.
- Outstanding for spas, negative/vanishing edges, and fountains; anywhere debris needs to be removed and anti-entrapment protection is required.
- Thousands installed world-wide!

The **MDX Debris Removal System™** is only available through Paramount Authorized Builders.
