

## The Most Powerful & Reliable ~ With You in Control!

Let Aquabot Turbo T-Solo Remote Control clean your entire pool in half the time it takes other cleaners and with far greater reliability, power and performance features. Relax as Aquabot Turbo T-Solo Remote Control cleans those areas other cleaners missed, and enjoy up to 50% total pool maintenance bill savings as your Aquabot works hard to save you money.

Feel good knowing that with the American made Aquabots you are doing your part to help the environment in addition to your wallet. Aquabot Turbo T-Solo Remote Control will reduce as much as 80% of water loss and chemically treated water from entering the environment. Its powerful circulation reduces energy consumption by raising pool water temperature so that pool heaters can run lower, and it equalizes chemical levels throughout, decreasing the wasteful and harmful overtreatment by chemicals.

In fact, an Aquabot Turbo T-Solo Remote Control can lower your chemical consumption by as much 30% and with an operating cost of about 1/30th that of pressure side cleaners your energy savings alone will pay for your Aquabot in as little as one season.

Of course if you prefer to take control, Aquabot Turbo T-Solo Remote Control will let you do just that. At the touch of a button you can direct its pinpoint forward / reverse movements and radius arc turn to maneuver and clean when and where you want to.

Working without hoses, the pool filter or costly to run booster pumps, Aquabot Turbo T-Solo Remote Control operates independently with its own reusable microfilter, vacuum pump and drive motor with navigation sensory built-in. Simply plug into its 24v power supply and press a button. Thats it. Nothing is more reliable or capable. Here are a few more reasons why:

- Unique systematic floor turning movements provides greater emphasis on-the-floor where the majority of the dirt resides, reducing wear and tear other cleaners incur requiring wasteful overlapping, lateral waterline movements just to move about the pool (spending up to 70% of their cleaning time on the walls) or attempting to learn a pool's various dimensions.
- The systematic cleaning movements ensure complete coverage of ANY pool without getting stuck in odd shaped areas.
- Rotating DeepClean™ brushes work in tandem with patented power washing jets to loosen waterline build-up and clean where brushes alone can't, including corners, seams and pores.
- Dirt and debris are vacuumed in through the largest vacuum port openings (for larger debris allowance) that are easily customizable for lower depth reach to pick up fine heavy sand, silt and pollen and greater water volume intake.

Rotating brushes break down debris while power washing jets flush up hard to reach dirt for easy vacuuming.

### Specifications

Designed For Pools:	Up to 50' length of any shape or surface
Suggested Cleaning Time:	2-3 Hours
Auto-Shut Off:	Yes, automatically shuts off when cleaning cycle is completed
Customization:	Yes, digital power supply allows for up to a 7-hour cleaning cycle or automatic operation with existing or new pool auto-control equipment
Filtration:	Self-contained reusable 23-quart capacity filters all debris types down to 2 microns
Filtration Quantity:	5,000 Gallons per Hour
Pump Motor:	Individually sealed, brushless oil-filled for lubrication and cooling, plus water-cooled
Drive Motor:	Two individually sealed, oil-free water-cooled
Cord:	75' self-buoyant durable thermoplastic rubber (no chlorine corroding Kevlar™)
Power Supply:	StayCool™ All-weather resistant
Operating Protection:	Reset button protects from out of water or unintentional operation
Operating Cost:	Estimated 5¢ per cleaning cycle
Wattage:	140 Watts
Voltage:	115 V / 60 Hz, 24 V at cleaner
Warranty:	4 years prorated / 300 Cycles
Safety & Reliability:	Cleaner, cord and power supply are ETL listed to UL Standards — the highest safety and reliability certification in the industry
Unit Dimensions / Weight:	16" x 15" x 13" / 19 lbs
Shipping Dimensions / Weight:	17.5" x 17" x 19" / 37.25 lbs

## **TURBO T-SOLO** **REMOTE CONTROL**

### *Take Control With The Most Powerful and Reliable Remote Controlled Cleaner Ever Made!*

The most powerful and reliable remote controlled swimming pool cleaner ever produced gives you the convenience and control to spot clean pools up to 50' long, of any shape or surface.

At the touch of a button guides Aquabot Turbo Solo Remote Control to spot clean virtually anywhere or let the automatic mode systematically clean your pool to scrub loose the stubborn debris, power wash out fine dirt from hard to reach areas, vacuum everything into its own internal filter and microfilter and circulate the water for the healthiest and lowest maintenance swimming.

Self-contained, this is all completed without the need for sloppy hoses, cumbersome connections to your pool filter, costly to run booster pumps, installation, assembly or even you.

Here are some of the reasons that make Aquabot Turbo Solo Remote Control the most effect, reliable and powerful cleaner on the planet:

- 4-way precision guidance
- wireless remote control
- Complete cleaning of ANY pool in as little as 1 hour
- Self-contained - no hoses or filter connections
- Quad brush system loosens stubborn debris
- Power washing jets clean where brushes can't
- Largest capacity reusable filter - less cleanings
- Industry's healthiest filtration and water circulation
- Total pool maintenance cost savings of up to 50%
- Eco-friendly - reduces chemical, water and energy waste
