

Kansas Water Quality Association

2010 MEMBERSHIP DUES

IMPORTANT: PLEASE READ

As independent water treatment dealers it is important that we maintain a unified voice to represent our industry. The national Water Quality Association is constantly fighting for our industries right to do business in numerous states across the nation. It has supported studies to dispel the myths and incorrect beliefs about water treatment devices.

If we as dealers maintain a viable and active organization with a strong membership, we stand a much greater chance of defending our rights and warding off laws that negatively impact our business and ultimately our customers. I strongly urge you to support the Kansas Water Quality Association as well as WQA.
