

Lubrigyn

CLEANSING MILK

Creamy, lubricating and moisturizing cleanser for everyday personal, intimate hygiene

200 ml

INDICATED FOR
Intimate hygiene
and all bodily areas

ACTIVE INGREDIENTS

PROPERTIES

HYALURONIC ACID

Intensive moisturiser.

ALOE VERA

Soothing action.

ELASTIN

Elasticising effect.

α-BISABOLOL (active ingredient of Chamomile),
MALLOW GLYCOLIC EXTRACT

Soothing, refreshing effect.

SWEET ALMOND OIL, JOJOBA OIL

Emollient, protective, lubricant properties.

WHY IS IT USED?

It is suitable for the mucous membranes present in intimate parts and for skin, in all types of **dryness, irritation, burning sensation and itching** caused by different agents such as:

- ➔ Hormone treatment
- ➔ Contraceptive pill
- ➔ Surgical operations
- ➔ Childbirth
- ➔ Diabetes
- ➔ Particular local treatment
- ➔ Pre-menopause
- ➔ Menopause
- ➔ Certain periods of the menstrual cycle
- ➔ For periods of stress

It is practical for immobile patients who may be cleansed without using water.

Lubrigyn

CLEANSING MILK

Creamy, lubricating and moisturizing cleanser for everyday personal, intimate hygiene

200 ml

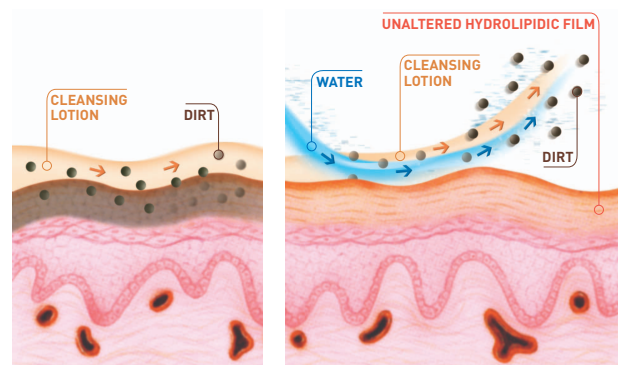

In vitro test on non-cornified skin illustrates the tolerability of the product on skin and mucous membranes. (Micr-Tox 09 Rev. 00 Method dated 29/04/03).

AFFINITY CLEANSING

With affinity cleansing, dirt is removed from the skin due to the fact that it dissolves in the same phase with which it is compatible, therefore avoiding aggressiveness which is caused by contrast cleansing (Surfactants).

Lubrigyn detergent acts by affinity, so that the fats in excess and the skin impurities are dissolved, without altering the hydrolipidic film and ensuring the barrier effect.

HYALURONIC ACID

The complex molecular structure of hyaluronic acid determines its physiological properties, in particular its capacity to reversibly absorb and subsequently release great quantities of water, reaching a high degree of:

- ➔ Moisturisation
- ➔ Turgidity
- ➔ Skin plasticity
- ➔ Viscosity

ALOE VERA

Aloe Vera is a mixture of more than 40 different elements, amongst which are vitamins, amino acids, enzymes, mucopolysaccharides, mineral salts, sterols and phytosterols which have softening, moisturising and soothing properties.
