20x2
ml

INDICATED FOR
Intimate parts
of the body

ACTIVE INGREDIENTS

PROPERTIES

HYALURONIC ACID

Intensive moisturiser.

ALOE VERA

Soothing action.

ELASTIN

Elasticising effect.

α -BISABOLOL (active ingredient of Chamomile),
Mallow Glycolic Extract

Soothing, refreshing effect.

SWEET ALMOND OIL, JOJOBA OIL

Emollient, protective, lubricant properties.

WHY IS IT USED?

It is used in order to prevent unpleasant situations due to scarce hydration and lubrication (**dryness, irritation, burning sensation and itching**) caused by different conditions such as:

- ➔ Hormone treatment
- ➔ Contraceptive pill
- ➔ Surgical operations
- ➔ Childbirth
- ➔ Diabetes
- ➔ Particular local treatment
- ➔ Pre-menopause
- ➔ Menopause
- ➔ Certain periods of the menstrual cycle
- ➔ For use after carrying out intimate hygiene using a soapy product.

It has also been created with the intention of improving and facilitating intimate relationships.

Lubrigyn

CREAM

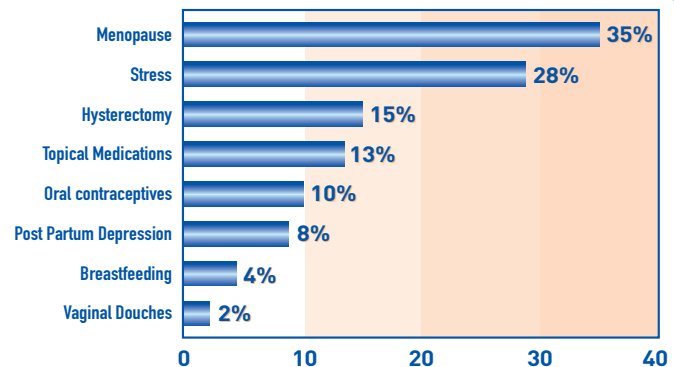

Long-acting pH balanced vaginal moisturizer and lubricant

20x2 ml

VULVAR DRYNESS DOES NOT ONLY HAPPEN DURING THE MENOPAUSE!

One speaks of dryness when the natural secretion, essential for the well-being of the vulvar eco-system, is scarce or even non-existent. This state of local dryness, together with uncomfortable phenomena of itching and irritation, may occur in different occasions of a woman's intimate life, starting from the phase of adolescence right up to the menopause, in either a transitory or a periodic way or even permanently.

HYALURONIC ACID

The complex molecular structure of hyaluronic acid determines its physiological properties, in particular its capacity to reversibly absorb and subsequently release great quantities of water, reaching a high degree of:

- ➔ Moisturisation
- ➔ Elasticity of the skin and the mucous membranes
- ➔ Turgidity

CALENDULA

Calendula is a remedy precious for its flavonic pigments, but also for the synergy of its active ingredients: a saponin, a resin, an essential oil, acids, alcohol and traces of salicylic acid. Its therapeutic properties include: antiseptic, anti-inflammatory, cicatrisant, useful for the various ailments of the genital organs, the treatment of skin and mucous membranes which are extremely irritated as well as circulatory problems.
