### WITCH-HAZEL

It is one of the plants most frequently used in Western medicine. It contains several substances amongst which are polyphenolic compounds such as tannins, flavonoids and phenolic acids. Its components introduce a marked vasoconstrictive effect causing an increase in venous tone. Its action manifests itself particularly on venous muscular walls.

### MALLOW

It has pink-purple flowers and it belongs to the Malvacea family. It has emollient, softening, anti-inflammatory, calming, laxative, expectorant and soothing properties. It is suitable for the treatment of irritated mucous membranes, ulcers, spots, haemorrhoids, skin inflammations, sores, burns and itching.

### HORSE CHESTNUT

Thanks to their main ingredients, the escines, Horse Chestnut extracts "at a capillary level carry out anti-exudative and anti-oedematous actions"\* and they guarantee a powerful vasoconstrictive action, and in this way they favour the relaxation of the route of the swollen and twisted varicose veins.
