

New Product

For Immediate Release

July 2, 2007

New Product Announcement

2008 Ford SD F250 / F350

6" Front Double Shock Hoop Kit

Features:

- No welding required
- Bolt on installation
- Dual shock mounting point
- Hardcore off-road look

Just released from Pro Comp Suspension is the 6" Front Double Shock Hoop Kit upgrade for the 2008 Ford Super Duty with 6" Stage I or II suspension lifts. The natural progression for any serious off-road driver is to increase the damping capacity of the front suspension without sacrificing travel. Pro Comp's 6" Front Double Shock Hoop Kit has a 3-point mounting design that ties the front coil bucket together with the frame for increased bucket rigidity as well as allowing for the addition of a shock forward of axle. Made from steel tubing the double shock hoop kit comes with the necessary hardware and lower mounting brackets to complete the install. Additional shocks are required to complete the kit and are sold separately.

Additional Shocks Recommended:

- | | | |
|----------|------|---|
| 925509 | (x4) | ES9000 Twin-tube gas pressurized shock |
| MX6129* | (x4) | MX6 Mono-tube adjustable gas pressurized shock |
| MX6065R* | (x4) | MX6R Mono-tube adjustable reservoir gas pressurized shock |
| 3207* | (x4) | MX2.0R Mono-tube reservoir gas pressurized shock |

*Reservoir shocks will require mounting clamp kit – clamp kits sold separately.
