New Product Announcement 2008 Ford Super Duty F250/ F350 5" Lift Rear Leaf Spring*

*Springs in photo shown as pair.
Springs sold individually.

Pro Comp Suspension has released the 5" lift rear leaf spring for the 2008 Ford Super Duty F250/F350. Progressive multi-leaf spring packs increase ride height and reduce axle wrap by eliminating the need for rear lift blocks. Tapered leaves and Teflon wear pads increase suspension travel and spring longevity. OEM style, steel encased, no maintenance rubber bushings eliminate squeaks that are common with use of urethane bushings. The springs are the most cost-effective way to replace rear springs and achieve desired ride height. Springs are sold individually.

2008 Ford SD F250/ F350 5" Lift Rear Leaf Spring
