SPECIAL ALERT:

Someone posing as us, who may have our customer list, may try to contact you. We appreciate your support of Pools & Spas, Inc. over the years. RAYNER COVERING SYSTEMS WINTER SAFETY COVERS

Rayner Pool Covers are made for strength and durability from only the best safety mesh and vinyl materials. Both top and bottom of these covers are fully webbed with polypropylene nylon webbing making your pool extra safe—wildlife and child-protected. Rayner pool covers are covered by a ten-year warranty.

What Type Of Cover Is Best For You?

Safety Mesh...

The safety mesh cover is the best choice if your main concern is for safety. Because mesh allows all water to drain through, it is absolutely maintenance free. Simply put it on the pool and forget about it until spring. Mesh is 100% polypropylene. It's lightweight yet strong with a bursting strength of 350 lbs. per square inch.

Vinyl With A Drain Panel

Want the benefits of a vinyl cover, but don't want to pump all the water off? Then a vinyl cover with a mesh drain panel is the right choice for you. Maintenance will be cut dramatically. Most, if not all, water will drain off your cover through the mesh drain panel. If you do still have a bit of water on the cover, you will have to pump it off.

Replacement Spa Covers for Any Brand of Spa

Think!

Before you get rid of that old pool cover

Pools & Spas, Inc. will take your old cover to have a duplicate made of it for the fall. (We need your old cover to use as a pattern.) Note that you want your pool cover replaced on your contract or tell our opening crew.
