

Lead Free corrosion free Precise Balance

An Improved Solution for Wheel Weight Applications

The 3M™ Wheel Weight System combines conformable wheel balancing material and industry-leading 3M™ Automotive Attachment Tape to provide an all-in-one, securely attached wheel weight balancing system. Designed to have less impact on the environment than the industry-standard lead wheel weights, the 3M Wheel Weight System is a proprietary product with unique properties built to meet our customers' ever-increasing needs for lead-free, quality products.

Key Features

Designed to replace environmentally harmful lead wheel weights, 3M Wheel Weight System consists of a unique, flexible and conformable material available in an easy-to-use, self-dispensing package used with a stand and cutting device. This product offers customers the potential for:

- Reduced cost of ownership – The 3M Wheel Weight System is provided as a roll good designed to be cut to weight. This provides precision balancing, which enables customers to reduce their cost of ownership by eliminating traditional wheel weight inventories of individual part sizes.
- Proven attachment history – 3M Automotive Attachment Tape has successfully attached millions of trim and accessory parts on vehicles for over 30 years.
