Long Lasting Leather Pockets

Unique “Split Leveling Board<sup>®</sup>”  
for Simpler Installation

Life Time Warranty

Standard 1” Slate for a Truer  
Playing Surface

1 ¼” Solid Wood Cabinet for  
Quality, Rigidity and Longevity

The John Anthony\* is a standard, 8' billiard table with tapered legs and an American flair. The rails boast a beautiful finish and compliment the handcrafted solid wood cabinet. The finish begins with a long lasting protective undercoating, followed by a hand applied stain and finished with a UV polyurethane spray. This gives the table protection for a lifetime. The rails are complimented with radiant, inset diamond sights for true and optimum play.

All Globalview Billiard tables are designed with a unique “Split Leveling Board<sup>®</sup>” to optimize shipping and to simplify installation in any room in your home. The subframe structure is also designed using “Dual - Double Cross Beams<sup>®</sup>” for added rigidity and to prevent slate sag.

\*The John Anthony is also available in a standard 7' veneered cabinet model
