

For Immediate Release

6/24/08

03-08 DODGE 2500/ 3500 CREW CAB (Non-Dually) - 4WD Traction Bars & Mounting Kit

72501B – Traction Bars

Features:

- Race inspired double tube design.
- Reversed hourglass bushings for lateral flex & axle articulation.

Pro Comp Suspension has just released new traction bars for the 03-08 Dodge Ram 2500/3500 Crew Cab (Non-Dually) - 4WD. These great looking traction bars add style and performance with race inspired features. Pro Comp's exclusive reverse hourglass shaped bushings provide the necessary resistance to reduce spring wrap while allowing lateral flex for axle articulation. Mounts for the traction bars are at fixed locations on the frame and at the axle. The forward mounts are bolted directly to the frame. The rear mounts are positioned between the axle spring plates and lift blocks.

Traction bars are sold in pairs without hardware or bushings.

Mounting kits are required to complete installation and are sold separately.
