Pro Comp Suspension has applied racing technology to create a dual sport, long arm suspension system for the 04-06 Jeep LJ Unlimited. This new 4" LJ long arm system maintains a lower roll-center for unparalleled off road stability, superior articulation and excellent on road performance. The lower arms are fabricated from laser cut 3/16" thick steel plate for outstanding durability and come equipped with aerospace grade high angle rod ends and long lasting polyurethane bushings. Adjustable length front upper arms are included to optimize pinion angle and alignment specifications. A rear truss strengthens the axle housing and provides a mounting point for the rear 4-link arms. This gives ideal rear suspension geometry and helps eliminate torque steer. The high clearance belly pan integrates attachment points for the lower arms and adds chassis rigidity. A removable center pan allows easy service access for the transmission and transfer case. Stage II systems feature MX6 adjustable front and rear shocks for outstanding ride comfort and handling. Stage I systems are available with ES9000 shock absorbers to deliver factory ride quality. 4" of lift allows the use of 35" x 12.50" tires on 16"+ diameter rims up to 9" wide with up to 5" backspacing.
