STAGE II SUSPENSION SYSTEM WITH MX6 SHOCKS

Rear Track Bar Reinforcement Bracket  
**NOW INCLUDED!**

STAGE I SUSPENSION SYSTEM WITH MX6 SHOCKS

Like our Moab proven Jeep JK 4" 4 Door lift system, the new Pro Comp 4" **Stage II HD-X System** for the 2007-2008 Jeep JK 2 Door (Non-Rubicon) 4WD/ 4 Door 2WD delivers top-level performance! Replacement lower control arms are manufactured from CNC formed, laser cut 3/16" thick steel plate and come equipped with rebuildable high angle spherical ball end and long lasting polyurethane bushings. Adjustable length front upper arms are included to optimize alignment specifications. Other features include; a heavy-duty adjustable front track bar constructed from 4130N chromoly tubing and an adjustable rear track bar bracket for proper axle alignment. Front sway bar disconnects, rear sway bar links, extended front bump stops, billet rear bump stop spacers, rear track bar reinforcement bracket (**NOW INCLUDED!**), off-set brake line relocation brackets, vehicle specific front and rear coil springs and shocks finish the package and provide an outstanding ride.

Pro Comp Suspension is also proud to offer an effective, affordable 4" **Stage I System** for the 07-08 Jeep JK 2 Door (Non-Rubicon) 4WD/ 4 Door 2WD. The systems are available with specifically rated front and rear coil springs to reduce body roll and improve ride quality. Rear sway bar links, extended front bump stops, billet rear bump stop spacers, rear track bar reinforcement bracket (**NOW INCLUDED!**), off-set brake line relocation brackets, and shocks finish the package and provide an outstanding ride.

4" of lift allows the use of **35" x 12.50" tires** on rims up to 9" wide with up to 4.5" backspacing. Stage I & II Suspension systems available with either MX-6 adjustable shocks that provide superior flexibility and off road handling or ES9000 shock absorbers delivering factory ride quality.
