2005-2007 Model Shown

2008 Model Shown

Pro Comp suspension offers the most complete performance suspension package available for your Ford Super Duty F250/ F350 4WD with the release of the XX front dual coil-over conversion suspension system. Up front, four MX2.75cfr Series (2008 models) or MX2.75cr Series (05-07 models) coil-over shocks multiply damping control to provide unmatched ride comfort on and off road. The coil-over shocks mount to rigid custom shock towers. 05-07 models use shocks hoops to for allow easy mounting of remote reservoirs. 2008 models come with piggy back reservoirs and do not require the additional shock hoops. Replacement radius arms locate the axle and provide proper caster specifications. Reinforced extensions locate the bump stops for optimum suspension travel.

8" systems allows the use of 38" x 14.50" tires for 2008 models (37" X 13.50" for 05-07 models) on 17"+ diameter rims up to 9" wide with up to 5.5" backspacing.

6" systems allows the use of 37" x 13.50" tires for 2008 models (35" X 12.50" for 05-07 models) on 17"+ diameter rims up to 9" wide with up to 5.5" backspacing.
