*6" Performance Suspension System  
 2004 Ford F150 4WD*

*Shipping: December*

Fabtech's 6" Performance System for the new body style F150 4WD's utilizes their proven cast steering knuckles and lower control arm crossmember technology with front suspension lift coming from extended length Coil Over shocks. The Coil Over shocks have been valved for increased offroad performance while utilizing the factory front coil springs for a smooth highway ride. Other standard features include a 1 / 4" thick steel differential skid plate, Impact Strut Tubes and the ability to use the stock spare tire. To speed installation the Rack and Pinion Steering assembly does not need to be relocated. A double pin 3" Block and U bolt system provides rear lift for the vehicle. System allows use of a 315/75R17 tire w/ 17 x 8 wheel w/ 5" BS. Available in Black or Blue powdercoat.

6" Performance System
