

New Product Announcement

Application & Description

2007 GM T900 Silverado / Sierra 2500 HD 4x4 Pickup 6" Suspension Systems

**Now
Shipping!**

Pro Comp Suspension's latest 6" MX suspension systems for the new body style GM 2500 HD trucks feature front and rear MX6 mono-tube adjustable shocks for exceptional ride comfort and handling. Other features include one-piece cross members and rigid upper control arm relocation brackets that preserve factory track width, steering geometry and alignment specifications. Rear lift is achieved with 4" tall blocks and add-a-leafs. Approximate installation time for complete suspension system is 7-8 hours. 6" of lift allows the use of 35" x 12.50" tires on 17"-20" diameter rims with up to 5" backspacing. Factory rims and spare tire can be used.

Part Number	Description	Jobber Price
51800BMX	MX Suspension System w/MX6 mono-tube adjustable shocks (5 boxes)	\$2387.48
51800B	Suspension System w/ES9000 twin-tube gas charged shocks (5 boxes)	\$2190.60
