2007 Jeep JK
4" Stage II X Flex Suspension System

**Now
Shipping!**

Pro Comp Suspension introduces the new 4" Stage II X Flex Suspension System for the 2007 Jeep JK 4 door Wrangler. This complete bolt-on system comes with all the necessary components for top level performance.

Replacement lower control arms are manufactured from CNC formed, laser cut, 3/16" thick A36 steel plate that feature 1/8" thick gusset plates for unyielding durability and come equipped with rebuildable high angle rod ends and long lasting polyurethane bushings. Adjustable length front upper arms are included to optimize alignment specifications. Other features include: heavy duty adjustable front track bar constructed from 4130N chromoly and an adjustable

rear track bar bracket for proper axle alignment. Front sway bar disconnects, rear sway bar links, extended front bump stops, billet rear bump stop spacers, off-set brake line relocation brackets, vehicle specific front and rear coil springs and adjustable MX6 Mono-tube, gas pressurized shocks finish the package and provide an outstanding ride. Systems available with ES9000 Twin-tube gas shocks. Complete bolt on installation – no welding required. Clearance for 35" tires (system was developed with 35x12.50 -18 tires on 18x9 rims with 4.75" backspacing).

No Driveline modifications required.
