

Mileage XS Economy Programmer PNs 1506, 1516, 2506, 2516, 3506, 3516

Superchips Announces ALL NEW Mileage XS Economy Programmer

The new Mileage XS is the first fuel economy programmer that will be validated for results. The first release will include all part numbers and comprehensive coverage with **2007 – 2008 GM 5.3L** and **2003 – 2006 Ford 6.0L Powerstroke** the first two calibration to go through Superchips new validation process. Mileage XS is releasing with some new economy specific calibrations and some from previous releases that through the R&D process, Superchips documented to have the best economy gains for specific vehicles. Superchips is on a R&D and certification schedule to validate new vehicle coverage roughly every week. Key features in the Mileage XS:

- Validated calibrations and economy gains.
- Current field tests have resulted in up to 15% MPG gained depending on engine and driving habits.
- Superchips taking orders NOW.
- First units estimated to ship early August.
- Flashpaq and Cortex units can be updated with economy calibrations at no cost at Superchips.com.
- Next calibrations to be validated are for the **GM Duramax** and **Ford Gas Truck** engine(s).
- CARB certification pending.
