2007-08 GM K2500 HD 8" PERFORMANCE SYSTEM

Our 8" Performance System has been redesigned to work in conjunction with GM's new Magna Transfer Case in 2007. This includes new differential mounts to be used with a CV front driveshaft for vibration free operation in 4WD high. New style steering knuckles have been designed to reduce the track width as compared to early model systems. High arched lower arm crossmembers with support tubes and impact struts distribute front suspension impact loads throughout the frame. Replacement upper control arms feature a tubular design with integrated shock tabs for use with an optional dual shock system for increase dampening. Rear lift is accomplished via a 2" Add-a-Leaf and 4" block system with extended length bump stops.

FEATURES AND BENEFITS

- Redesigned to work in conjunction with GM's new Magna Transfer Case in 2007
- New style steering knuckles have been designed to reduce the track width as compared to early model systems

TIRE AND WHEEL SIZE

- Use 37/1250R17 tires w/17x9 wheels w/4 5/8" BS w/minor trimming
- Use 355/65R18 tires w/18x9 wheels w/5 1/2" BS w/minor trimming

FOOTNOTES

1. Front driveshaft modification required or order CV driveshaft (FTS91004)
2. Must ship truck freight
