2007-08 POLARIS RAZOR LONG TRAVEL SUSPENSION SYSTEM

Fabtech expands their line of successful Long Travel UTV applications to include the Polaris RZR. Designed as a complete system, the front control arms feature construction of 1.25 OD .120 wall 4130 Chromoly tubing with dimple die gusset plates for unsurpassed strength. Arms are located to the frame via graphite impregnated Delrin bushings. Front arms utilize 3/4" teflon lined heim ends at the spindle. Rear upper arms are built with .125 thick steel plate while lower arms are 1.25 OD .120 wall 4130 Chromoly. Rear upper and lower arms utilize Delrin frame bushings. To properly strengthen the frame for aggressive driving this system includes a weld on frame gusset kit. This system increases wheel travel to 13" for aggressive offroad driving. Working in conjunction with the wider track width and increased travel, Fabtech includes steering rod extensions with 1/2" heim ends and replacement 4340 heat treated axle shafts.

The heart of this system is Fabtech's Dirt Logic 2.0 Resi Coilover shocks. These shocks contain components from Fabtech's race shock line for maximum durability. Extensive ride work was performed to dial in the shock valving in for aggressive high speed offroad driving while still providing a comfortable low speed ride for cruising around campsites and pits.

All components included in this system are finished in a neutral gun metal gray powdercoat.

FEATURES AND BENEFITS

Dimensions compared to stock

Width - 6" wider per side

Height - 3" taller

Wheelbase - 4" longer overall, 2" front and 2" rear

INSTALLATION & TECH

- Install time - 4 Hours
- Welding required - Yes, Gusset Kit
- Cutting required - Trimming of rear plastic fenders to fit aftermarket tires
- Holes to drill - 2

TIRE AND WHEEL SIZE

- Stock tires and wheels - Yes
- Aftermarket tire sizes
 - Front 26x9R12
 - Rear 26x12R12
- Aftermarket wheel sizes
 - Front 12x6 w/4+2 offset
 - Rear 12x8 w/5+3 offset
