

POWER PRO

Easy To Use Performance Tuner

POWER PRO tuners are state-of-the-art engine management tools, which deliver extraordinary power and torque gains, unparalleled transmission controls and improved fuel efficiency. POWER PRO tuners feature advanced "plug and play" technology for easy installation. POWER PRO tuners allow you to tune your vehicle for use with regular or premium fuels. Once plugged in, users can raise or lower rev and top speed limiters, increase or decrease transmission shift points and shift firmness, and calibrate speedometer and odometer for tire size and/or differential gear changes. POWER PRO tuners can also read and clear vehicle DTC's (diagnostic trouble codes).

All engine and vehicle operations work exactly the same, except your engine and transmission will now work more efficiently – which equals more power, more torque and better MPG!

Optimized performance and improved drivability...At the push of a button!

APPLICATIONS UPDATE - THRU 7/08

Part #	Year	Make	Model	Engine	Trans	Tire Range	Rear Gear	DTC
PC32000	96-01	GM	Sierra/ Silverado/ Suburban/ S10/ Tahoe/ Yukon	4.3L/ 5.0L/ 5.7L/ 7.4L	All	24" - 34"	Yes	Yes
