and happy memories!*

*Alpha*

# Alpha

After a long, hot day, what could be more inviting for parents and kids than coming home to your own pool. It's a whole new world of laughter and water-splashed family fun in the comfort of your own yard. And CORNELIUS leads the way with a wide range of affordable above ground pools.

## Designed for fun and built to stay that way

Incredible value is built right into our **ALPHA** above ground pool. Designed with active families in mind, the **ALPHA** features strength and beauty as an attractive addition to any family's home.

The **ALPHA** boasts a completely integrated construction from the ground up. Three key components form the sturdy backbone of this pool—the wall, frame and sub-frame.

We start with a heavy gauge steel wall. Featuring a standard skimmer cut out, it is hot-dip galvanized and given additional weather protection by the application of polyester "Weatherizer" paint coating. An attractive wall pattern is added and then sealed with our resilient "Krystal Kote®" coating, which provides an extra barrier from the elements and pool chemicals.

The cognac colored pool frame includes a 6-inch steel ledge and 5-inch steel post, each protected with polyester paint and clear "Krystal Kote®" topcoat. Two-piece injection molded resin caps complete the structure.

The sub-frame consists of double-rolled steel tracks joined with large, heavy gauge connectors and oversize hardware.

## Do it yourself installation

If you're handy with a screwdriver, then you can easily assemble your own **CORNELIUS** pool. We've designed each pool to make installation a problem-free joy—no multi-sized washers or nuts to worry about. Just one large screw type is used to assemble the entire pool and we provide easy to follow instructions, plus a video.

## A size to fit any yard

The **ALPHA** is available in 48" and 52" depths and in a variety of Round and A-Brace Oval sizes. A wide selection of liners is also available to make your new pool the centerpiece of your back yard.

Form Fitting Support Cap

SIZES (Feet)	
Round	A-Brace Oval
