## Fox Racing Shox Tuning Tips

---

1. All recommendations are just that and may still require additional changes to suit your personal riding style and/or comfort level
2. Rebound and compression adjustments should always be at the middle setting to start tuning. (example: 22 rebound adjustments will start at 11)
3. When making adjustments always focus on adjustment at a time. Making several changes at once can make tuning hard and inaccurate.
4. If you ever have questions call or e-mail us and we will help you with any questions you may have.
