

# GOCLAWS PRODUCT FACTS

## Unique Characteristics:

- Self-Tracking
- Self-Cleaning
- Self-Tensioning
- Positive-Locking
- USA and international patent protection for the “method and apparatus for increasing traction of a wheel”

## Product Highlights:

- Manufactured exclusively from BASF high performance polyurethanes.
- Unique, innovative design and construction is aesthetically pleasing.
- Advanced engineering design prevents side skidding and is continually self-cleaning.
- Available in sizes to fit small passenger cars through large trucks.
- In addition to snow, the FLEX-TRAX system provides traction benefits in other adverse driving conditions such as mud and sand.
- GoClaws is covered by a limited warranty against substandard materials and/or workmanship.

## Benefits:

- Quickly and easily installed / removed. One set installs in about 5 minutes without requiring movement of the vehicle or removal of tires.
- Self-cleaning. Unlike chains or mud and snow tires, GoClaws will not clog and lose traction.
- Self-tracking: the unique design helps keep each set of GoClaws centered on its tire.
- Self-tensioning: automatically conforms to tire profile.
- Positive-Locking: prevents linkage from accidentally disengaging.
- Road & vehicle friendly. Will not damage roadways or vehicle under normal operating conditions.

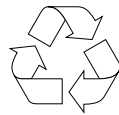

- Fully rotational and durable for extra long life.
- Modular construction. Allows for easy replacement of single units.
- Exceeds S.A.E. internal clearance requirements for each vehicle class.
- Outer step transitions allow for a smoother ride.
- Works effectively even if already stuck... without the need to move vehicle.

## PREMIUM TIRE CHAINS / GOCLAWS COMPARISON

Item	FLEX-TRAX GoClaws	Snow Chains
Set Weight	12 lbs.	24 lbs.
Cost	Comparable	Comparable
SKU's	6	65 (Premium SKU's)
Coefficient of Friction	Approx. 10 Better than Chains	Approx. 10 Worse than FLEX-TRAX
Installation Time (Set)	Approx. 5 min.	Approx. 30 min.
Damage to Road	No, Not Probable	Yes, Possible
Damage to Vehicle	No, Not Probable	Yes, Possible
Clogs During Use	No	Yes
Installation While Stuck	Yes	No
SAE Clearance	Meets or Exceeds Standards for Each Class	Some Styles Do Not Meet Clearance Standards

# Introducing a Better Way to Quickly & Easily Solve Vehicle Traction Problems!

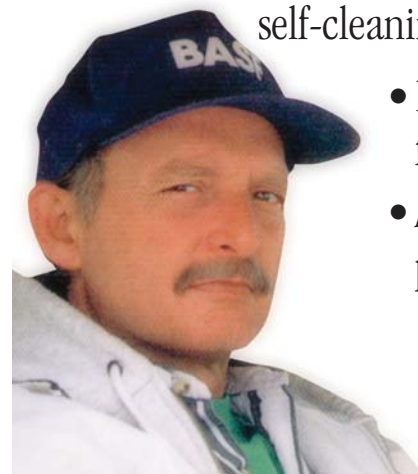

Now, after extensive testing and refinement, GoClaws are in production and orders are being accepted.

## GOCLAWS ARE...

- Easy to install & remove without jacking up vehicle.
- Durable and provides a smoother ride than typical tire chains.
- Available in three sizes, which meets the requirements for over 98% of all highway vehicles.
- Positive-locking, self-tensioning and self-cleaning.

*Manufactured exclusively from BASF high performance polyurethanes.*

*FLEX-TRAX, Inc. was founded by Tony Bright, the inventor of the FLEX-TRAX technology, to provide consumers an advanced traction system that is a significant improvement over snow chains, snow tires and other snow traction devices.*

- Road and vehicle friendly.
- Attractively priced.

## GOCLAWS ARE AN IDEAL SOLUTION FOR A WIDE VARIETY OF TRACTION NEEDS.

- Perfect for personal vehicles in snow.
- Low cost and quick and easy installation makes GoClaws ideal for delivery services and fleet use.
- Outdoor enthusiasts can easily strap-on the extra traction they need for mud, sand & snow.

- Logging, Mining & Forestry services can use GoClaws to cover difficult terrain.
- GoClaws can assist Police, Emergency Services & Beach Patrols move in all kinds of weather conditions.

- Utility Companies can use GoClaws to help reach tough areas for repairs or installations.

Whatever your situation, if you need extra traction, Flex-Trax GoClaws can keep you on the move.

*GoClaws unique self-cleaning design minimizes mud and snow build-up in the chambers giving you better traction.*

## EASY INSTALLATION IN 2 - 4 MINUTES PER TIRE.

GoClaws are designed to make installation as quick and easy as possible, requiring only the included tension adjustment tool. Once you've

familiarized yourself with the process, you should be able to install GoClaws in 2 to 4 minutes per tire.

Contact us for more details about how you can start offering GoClaws to your customers.
